Over 100kmph storm hits 2nd time in a month

Windspeed of 109 kmph recorded in Hathras, 100kmph at Agra; Mirzapur tehsil witnesses 100 mm rainfall, Ayodhya 90 mm, temp drops

HT Correspondent

letters@hindustantimes.com

LUCKNOW: With wind speed crossing 100 kmph, another major thunderstorm, moderate to heavy rain and lightning struck Uttar Pradesh between Thursday night and Friday early morning, as per data shared by the Lucknow meteorological centre, and claimed several lives.

The highest wind speed of 109 kmph was recorded in Hathras, 100 kmph at Agra, 96 kmph in Bulandshahr, 94 kmph in Shahjahanpur and 91 kmph in Jalaun, the meteorological office said.

This was the second major hailstorm that hit the state in 15 days.

Earlier on May 13, a far stronger hailstorm had lashed Uttar Pradesh when a man was reportedly lifted nearly 50 feet into the air with a tin shed before crashing into a tein field in Bareilly.

A fortnight ago, strong winds with velocities ranging from 74 to 130 kmph hit several districts, the met office had said, adding that the highest wind speed of 130 kmph was recorded in Bareilly and Prayagraj districts then.

"Thunderstorms or dust storms are not unusual during this season. The storm resulted from western disturbances and its interaction with easterly winds," said Manish R Ranalkar, director at the Lucknow met office, about Thursday night's storm.

Several parts of east Uttar Pradesh experienced rain up to 100 mm.

For instance, Mirzapur tehsil recorded 100 mm rainfall, Ayodhya 90 mm, Prayagraj 61 mm, Unnao 59 mm, Siddharthnagar 51 mm, Ambedkar Nagar 43 mm, Ghazipur 38 mm, Azamgarh 37.6 mm, Basti 35 mm, Chitrakoot 33 mm, Sant Kabir Nagar 31 mm, Kannauj 30 mm, Varanasi BHU 29.2 mm, Barabanki at Nawabganj Tehsil and Ghazipur 25 mm, Banda 24 mm and Amethi 23.3 mm.

In Lucknow, Bani recorded 18 mm rainfall, Malihabad 17 mm, and the airport 3 mm. The storm originated from north-west UP and moved towards the state's eastern region, according to the met office.

On Friday, the maximum and minimum temperatures in Lucknow were 33 (7.1 degrees below normal) and 20.9 degrees Celsius respectively.

Due to rainfall, the day temperatures in most cities of Uttar Pradesh remained below normal. In two cities, it dropped by over 10 degrees below normal on Friday.

The maximum temperature in Ballia dropped to 27.5 degrees Celsius, which is 10.1 degrees below normal and at Ghazipur it was 29 degrees Celsius, which is 10.2 degrees below normal. The forecast for Lucknow is a partly cloudy sky with few spells of rain/thundershowers accompanied by gusty winds on Saturday.

The maximum and minimum temperatures will be around 33

(Top) A man passes a damaged electric pole after a late-night storm in Lucknow on Friday. Residents claimed that despite repeated complaints to the electricity department, no repair crew had arrived, while live wires hanging in the area continued to pose a major safety hazard. (Above) In Jalaun, a charpoy blown away by the storm got lodged in an electric pole.

DEEPAK GUPTA/HT PHOTO

and 23 degrees Celsius, respectively. IMD has also issued a warning of thunderstorm/lightning accompanied by gusty winds. A hailstorm is very likely at isolated places over the area at night.

There is a likelihood that the spell of widespread rainfall—accompanied by squalls and storms—will persist in the region until May 31, resulting from the interaction between moist easterly winds in the lower troposphere and a Western Disturbance. The maximum temperatures are expected to drop further by 5 to 7°C.

The state forecast is rain/thundershowers are very likely at many places over the area.

IMD issued a warning that thunderstorm/lightning accompanied by gusty winds (speed 50-60 to 70 kmph) is very likely at isolated places over West UP and East UP.

Heavy rain is also very likely at isolated places over West UP. According to the X handle of Rahat UP, "IMD has expressed a strong likelihood of severe thunderstorms, rain, and hailstorms in Uttar Pradesh till May 30, 2026. The general public is urged to stay in safe places during inclement weather, refrain from venturing out unnecessarily, and adhere to the guidelines issued by the administration."

The weatherman said, "Consequently, there is a strong possibility that the heatwave (Loo) conditions will completely cease across the state."

BELOW NORMAL MONSOON FORECAST IN UP TOO

LUCKNOW: There is a high probability that the total cumulative rainfall during the monsoon season will remain below normal in Uttar Pradesh, according to the Lucknow Met office.

This is due to the combined influence of prevailing neutral El Niño conditions in the equatorial Pacific Ocean—which are expected to progressively warm up and evolve into weak-to-moderate El Niño conditions during the monsoon season—and neutral Indian Ocean Dipole conditions, according to Atul Kumar Singh, senior scientist at the Lucknow Met office.

The number of heatwave days across most parts of the state next month is likely to be two to three days higher than normal, Met office said.

HTC

Storm kills many across UP, leaves trail of destruction and disruption

LUCKNOW: A powerful storm accompanied by heavy rain, lightning and strong winds swept across several districts of Uttar Pradesh on Thursday night and Friday, killing at least 14 people, damaging homes and infrastructure, disrupting power and rail services, and causing hardship for residents.

The worst toll was reported from Kaushambi, where four people, including a woman and her two young children, died after an uprooted neem tree crashed onto their mud house during the storm. Another man was killed when a tin shed blown away by strong winds collapsed on him. Pratapgarh reported the death of an 85-year-old woman after a shed pillar gave way, while two people died in separate wall-collapse incidents in Prayagraj.

A senior official, however, said casualty figures and damage reports are currently being compiled and verified.

Lightning strikes claimed three more lives in eastern UP. A farmer in Azamgarh, a retired railway employee in Ballia and a 32-year-old woman in Deoria were killed after being struck by lightning. The woman's brother sustained burn injuries.

In Saharanpur, sudden flooding triggered by torrential rain in the Shakambhari Devi area swept away more than a dozen vehicles. Two women died after being caught in the strong current. Rescue operations continued through the night as authorities searched for missing vehicles and assessed the damage.

The storm also claimed the life of a 55-year-old labourer in

Boatmen try to recover a boat in Ganga following strong wind and rain at the bank of Sangam, in Prayagraj.

PTI

Mathura. Om Prakash was sleeping on roof of his house when a tin sheet blown off a neighbouring house struck him fatally.

Beyond fatalities, the storm caused extensive destruction across the state. Trees, tin sheds, huts and electricity poles were uprooted in many districts. More than 50 power poles were damaged in Mainpuri alone, while power supply was disrupted across parts of the Braj region. A tree fell on a moving car in Mathura, though its occupants escaped unharm.

Rail traffic on the Gorakhpur-Bihar and Gorakhpur-Varanasi routes was disrupted for nearly three hours after trees fell on tracks.

Residents faced power outages, blocked roads, disrupted transport and long traffic snarls as authorities worked to restore normalcy.

STATE TURNS TO GRASSROOTS NETWORK FOR WEATHER ALERTS

LUCKNOW: The district administrations have launched an extensive awareness campaign to warn residents about fresh spells of severe weather.

Acting on advisories issued by Met Department and the UP Relief Commissioner's office, authorities are using both traditional and modern communication channels to reach people, especially in vulnerable areas.

In rural regions, drum-beaters have been deployed to carry weather warnings from village to village, while urban areas are using traffic system loudspeakers and Police Response Vehicles (PRVs) to broadcast safety messages. Several districts have also hired vehicles fitted with public address systems to reach remote and densely populated localities.

HTC

YOGI ASKS DMs TO INTENSIFY STORM RELIEF, RELEASE FUNDS PROMPTLY

LUCKNOW: Taking cognisance of the large-scale damage caused by strong storms, rain, and lightning in several districts late Thursday night, CM Yogi instructed all DMs to intensify relief operations, assess losses, and ensure the prompt release of relief funds, a government statement said on Friday.

Administrative officers have been directed that any negligence in relief work will not be tolerated. The storm, heavy rain, and lightning that struck several districts of state late Thursday night caused significant damage and disrupted normal life.

The chief minister directed all district magistrates to immediately visit the field and conduct surveys. He also instructed that relief and rescue operations be regularly monitored and that updated situation reports be submitted to the government every three hours. In addition, officials have been asked to share information regarding compensation distribution, relief camps, rescue operations, and other administrative activities on social media platforms so that accurate and timely information reaches public.

The chief minister appealed to people of UP to remain alert during adverse weather conditions, avoid unnecessary travel, and strictly follow the guidelines issued by the administration.

HTC

{ THREE INJURED } ENGINEER, SUPERVISOR SUSPENDED, RS 50L PENALTY IMPOSED ON CONTRACTOR

Tin shed collapses at Charbagh railway station, incoming train stopped in nick of time

HT Correspondent

letters@hindustantimes.com

LUCKNOW: A large portion of a tin shed collapsed on Platform No. 5 of the Charbagh railway station in Lucknow on Friday morning, injuring three people, including a travelling ticket examiner (TTE), and forcing railway authorities to stop the approaching Howrah-Dehradun Express moments before it entered the platform, preventing what could have turned into a major tragedy.

Railway officials said the incident occurred around 8 am amid ongoing construction and repair work linked to the concourse project at the station.

In an official statement, Northern Railway said the project engineer and a supervisor were suspended and a penalty of Rs 50 lakh imposed on the contractor.

A high-level committee was constituted to investigate the incident, the statement added.

The TTE, Bhupendra, suffered a fractured leg while two passengers, identified as Abhishek and Sahil, also sustained injuries. Sahil reportedly suffered severe injuries after his leg became trapped

The portion of a tin shed that collapsed at Charbagh railway station in Lucknow on Friday.

MUSHTAQ ALI/HT PHOTO

under the collapsed structure.

Sunil Kumar Verma, divisional railway manager, Northern Railway, confirmed that a portion of the platform shed collapsed, causing injuries to three persons.

"At around 8 am today, a portion of the platform shed over Platform 5 at Lucknow Charbagh Station tilted on PF surface. Three individuals sustained minor injuries in the incident. RPF personnel responded swiftly, rescuing all three victims, who were subse-

quently admitted to a private hospital.

A railway medical team also deputed to hospital for providing assistance. Two persons have been discharged from the hospital.

The area is currently undergoing construction for a new air concourse, which required the temporary closure of Platform 4 to passenger trains from May 15 to June 23, 2026. The work is being executed by Rail Land Development Authority (RLDA).

HC seeks responses from Centre, UP government, CBSE on OSM

LUCKNOW: The Lucknow bench of the Allahabad high court on Friday sought a response in four weeks from the respondents—the Central government, the CBSE, the Controller of Examinations, and the Uttar Pradesh government—on a public interest litigation (PIL) challenging the new on-screen marking (OSM) system introduced by the Central Board of Secondary Education for the 2025-26 Class 12 examinations.

The petitioner will be able to file a reply within two weeks thereafter.

A division bench of Justice Rajan Roy and Justice Pramod Kumar Srivastava passed the order on a public interest litigation filed in person by Mohit Ashok, a Lucknow-based advocate.

The petitioner alleged that the hasty implementation of the digital evaluation system led to a "systemic institutional failure" in the evaluation of millions of students across the country.

PIL SEEKS FORMATION OF INDEPENDENT EXPERT COMMITTEE TO EXAMINE IMPLEMENTATION OF ON-SCREEN MARKING SYSTEM AND IDENTIFY ALLEGED FLAWS IN THE EVALUATION

The petition requested the formation of an independent expert committee to examine implementation of the OSM and identify alleged flaws in the evaluation.

The petition also demands that the answer sheets of all affected students be re-evaluated free of charge by adequately trained evaluators. During the hearing, the respondents' lawyers sought time to file their responses in the case. After granting this, the court has fixed the next hearing of the case in August.

The CBSE announced the Class 12 result on May 15 and has since been under fire over the use of on-screen marking system for the evaluation.

The application link to get scanned copies of Class 12 answer sheets was activated on May 19 and closed on May 25, 2026.

Several students and teachers have alleged various irregularities in the evaluation process. As per student complaints, the answer sheets of other candidates were allegedly uploaded under incorrect roll numbers. Many scanned copies were reportedly blurry, truncated, or unreadable, leaving several answers unchecked.

The board announced the implementation of OSM on February 9, a week before the Class 12 board examination commenced on February 17, 2026.

MANOJ KUMAR SINGH

TRANSFORMER FAILURES TRIGGER WIDESPREAD OUTAGES IN LKO

LUCKNOW: Prolonged power outages triggered by transformer failures in Dubagga, Kakori and Gosainganj disrupted normal life across Lucknow and adjoining rural areas, sparking protests and administrative intervention.

The worst-hit area was Rampr Bhubar under the Dubagga substation, where a transformer caught fire late Thursday night, leaving nearly 300 families without electricity for almost 23 hours. The outage also affected water supply. Following intervention by chief engineer Ram Kumar, two new transformers and aerial bunched cable circuits were installed.

In Rasoolpur village under the Kakori substation, a 100 KVA transformer failure left over 500 households without power for nearly 10 hours.

Another fault in Gosainganj disrupted power supply to around 100 families for nearly 20 hours.

Beyond the three major transformer failures, widespread disruptions were reported across multiple parts of Lucknow and adjoining areas. Two electricity poles collapsed in Swanankol Colony of Ismailganj-II ward during strong winds and rain, cutting off power supply to the entire locality at 3 am.

HTC

60-YEAR-OLD MAN HELD FOR RAPING 6-YEAR-OLD

LUCKNOW: A 60-year-old man was arrested for allegedly raping a 7-year-old neighbour girl after luring her to his home in Thakurganj area with promise of a candy, police said on Friday.

The victim's family alleged that the accused, identified as Mohammad Shakeel, a resident of Amrapali Chowki area under Thakurganj police station, called the minor to his house around noon on Friday. He bolted the door from inside and allegedly sexually assaulted her, police said. The child returned home crying and narrated her ordeal to her family, who filed a complaint at the Thakurganj police station, officials said.

Thakurganj inspector Omveer Singh confirmed that FIR had been registered under Section 63 of BNS based on the complaint by the victim's family.

Police said the accused had been taken into custody, while the victim had been sent for a medical examination.
